Professional Summary

Electronics and Communication Engineering undergraduate (SVNIT, graduating 2027) with a strong foundation in SQL, Python, data structures and algorithms, and database management. Experienced in building full-stack applications and designing normalized MySQL schemas. Skilled in Excel and Tableau for reporting and dashboards.

Technical Skills

Programming Languages: Python, SQL, C++, JavaScript, C (Basics)
BI & Visualization Tools: Microsoft Excel, Tableau
Databases: MySQL, SQL, Database Design
Core Concepts: DBMS, OOP, Data Structures & Algorithms
Web Technologies: HTML, CSS, Node.js, Express.js, REST APIs
Developer Tools: Git, GitHub, Visual Studio Code, Postman
Soft Skills: Team Building, Leadership, Social Skills, Problem Solving, Communication Skills
Languages: English (Professional), Telugu (Native), Hindi (Proficient)

Education

Sardar Vallabhbhai National Institute of Technology (SVNIT) 2027
B.Tech, Electronics and Communication Engineering – 6.35 CGPA

Board of Intermediate Education, Andhra Pradesh 2023
Senior Secondary – 89.9%

Board of Secondary Education, Andhra Pradesh 2021
Secondary – 95.33%

Personal Projects

Personal Finance Tracker API | *Node.js, Express, MySQL, JWT* GitHub

- Built a RESTful personal finance tracker API in Node.js/Express and MySQL with JWT authentication, bcrypt password hashing, rate limiting, and per-user data isolation across accounts, categories, transactions, and budgets.
- Implemented atomic fund transfers using database transactions and row-level locking (SELECT ... FOR UPDATE); verified zero balance drift under 40 parallel transfers.
- Developed SQL analytics endpoints using window functions (LAG, RANK, running balance) and Z-score outlier detection on a database seeded with 55,000+ transactions.
- Cut a monthly report query from about 47 ms to 10 ms using a date index (EXPLAIN ANALYZE).

Appointy – Doctor Appointment Booking Platform | *Node.js, Express, MySQL, JWT* GitHub

- Engineered a full-stack appointment booking platform with distinct patient, doctor, and admin roles, implementing JWT-based authentication and bcrypt password hashing for secure access control.
- Designed and built a RESTful API in Node.js/Express with role-based access control (RBAC), backed by a normalized MySQL schema for users, appointments, and doctor profiles.
- Implemented local file storage for doctor profile photo uploads using Multer, integrated a fee-display and mock payment step, and tested all endpoints with Postman.

Personal Portfolio Website | *HTML, CSS, JavaScript* GitHub | Live

- Designed and developed a responsive personal portfolio site from scratch using HTML, CSS, and JavaScript to showcase education, certifications, skills, and project work.
- Built modular, reusable sections (hero, about, education, skills, projects, contact) with a consistent design system for easy content updates.
