Professional Summary

Electronics and Communication Engineering undergraduate (SVNIT, graduating 2027) with a strong foundation in SQL, Python, data structures and algorithms, and database management. Experienced in building full-stack applications and designing normalized MySQL schemas. Skilled in Excel, Power BI, and Tableau for reporting and dashboards.

Technical Skills

Programming Languages: Python, SQL, C++, JavaScript, C (Basics)
BI & Visualization Tools: Microsoft Excel, Power BI, Tableau
Databases: MySQL, SQL, Database Design
Core Concepts: DBMS, OOP, Data Structures & Algorithms
Web Technologies: HTML, CSS, Node.js, Express.js, REST APIs
Developer Tools: Git, GitHub, Visual Studio Code, Postman
Soft Skills: Team Building, Leadership, Social Skills, Problem Solving, Communication Skills
Languages: English (Professional), Telugu (Native), Hindi (Proficient)

Education

Sardar Vallabhbhai National Institute of Technology (SVNIT) 2027
B.Tech, Electronics and Communication Engineering

Board of Intermediate Education, Andhra Pradesh 2023
Senior Secondary

Board of Secondary Education, Andhra Pradesh 2021
Secondary

Academic Projects

Design and Simulation of CSpRR Sensor for Adulteration Detection in Milk Using ML Ongoing
- Designing and simulating a Circular Spiral Ring Resonator (CSpRR) based microwave sensor in the 2.5–3.5 GHz band for non-invasive detection of water adulteration in milk.
- Validating simulation results against a published research paper to benchmark accuracy.

Personal Projects

Personal Finance Tracker API | *Node.js, Express, MySQL, JWT* GitHub | Ongoing
- Building a RESTful personal finance tracker backend in Node.js/Express with JWT authentication and bcrypt password hashing, with endpoints for user accounts, categories, and transactions.
- Designed a normalized 5-table MySQL schema (users, accounts, categories, transactions, budgets) and connected it through a pooled mysql2 connection.
- Implemented transaction creation with atomic balance updates inside database transactions, plus pagination and filtering for transaction listing; tested all endpoints with Postman.

Appointy – Doctor Appointment Booking Platform | *Node.js, Express, MySQL, JWT*
- Engineered a full-stack appointment booking platform with distinct patient, doctor, and admin roles, implementing JWT-based authentication and bcrypt password hashing for secure access control.
- Designed and built a RESTful API in Node.js/Express with role-based access control (RBAC), backed by a normalized MySQL schema for users, appointments, and doctor profiles.
- Implemented local file storage for doctor profile photo uploads using Multer, integrated a fee-display and mock payment step, and tested all endpoints with Postman.

Personal Portfolio Website | *HTML, CSS, JavaScript*
- Designed and developed a responsive personal portfolio site from scratch using HTML, CSS, and JavaScript to showcase education, certifications, skills, and project work.
- Built modular, reusable sections (hero, about, education, skills, projects, contact) with a consistent design system for easy content updates.
